

URETHANE COMPOSITES. BUILT BEYOND FRP.

XCoatings™ delivers VOC-free, zero-styrene urethane composite systems engineered to reduce labor, eliminate fiberglass print-through, and increase production throughput.

-
- VOC-Free• Zero Styrene
 - Reduced Labor
 - Increased Throughput

URETHANE COMPOSITES. BUILT BEYOND FRP.

XCoatings™ delivers VOC-free, zero-styrene urethane composite systems engineered to reduce labor, eliminate fiberglass print-through, and increase production throughput.

BENEFITS

0%

Zero styrene. Zero compromise.

No styrene or vinyl ester monomers. 0 g/L VOC.

- Mitigate Title V limitations
- Reduce emissions below cap limits
- Potential to earn emissions allowances

Increase Production Efficiency and Performance

Cure faster than traditional FRP—no ovens required. Spray-applied structural foam eliminates manual core placement.

- Faster cure times
- Increased production rate
- Reduced labor demand
- Automation-ready

Quality Finish and Performance

Class-A surface with zero glass print-through. UV-stable aliphatic gelcoat chemically bonds to structural backing.

- High-gloss Class-A Finish
- UV-stable
- Custom colors & properties

PATENTED COMPOSITE STRUCTURE

Aliphatic Gelcoat

UV-stable, Class-A surface finish

Structural Foam

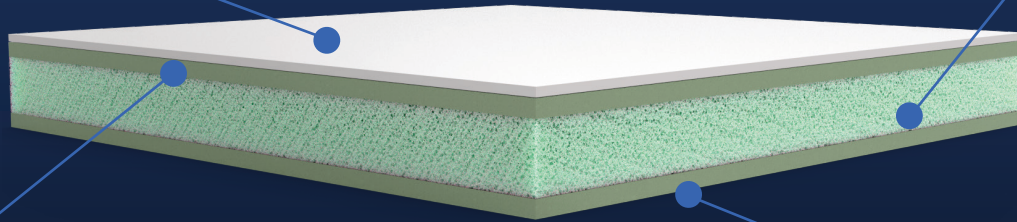

Lightweight, rigid core

First Elastomer

Rigid interlayer for load distribution

Second Elastomer

Bonded backside layer to maximize stiffness

INDUSTRIES WE SERVE

Marine and RV Manufacturing

Complete composite solutions and flotation foams for spray-up and lay-up operations.

Bathware, Spa and Pool

Solutions for tubs, shower pans, outdoor spas, swim spas, and fiberglass pools.

Construction and Infrastructure

Marine pile jackets, launder covers, utility poles, and civil projects.

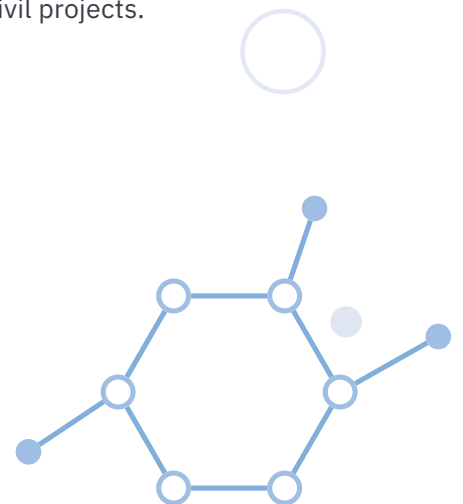

Truck and Trailer Panels

Lightweight solutions for running boards, wind deflectors, and automotive panels.

Other and Specialty Applications

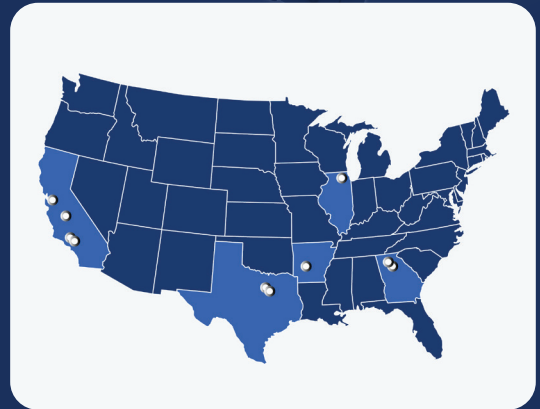

Custom solutions engineered to your unique composites needs.

ABOUT US

XCoatings™ is an American manufacturer of advanced polyurethane composite systems engineered to replace traditional fiberglass spray-up. As a premier brand of Polycoat Products, we bring decades of expertise in polyurea and polyurethane coatings. Backed by American Polymers Network — a family of innovative brands with over 1,000,000 sq ft of manufacturing across six facilities on three U.S. sites — XCoatings™ delivers:

- Advanced composite materials
- Spray equipment & robotic systems
- Fully integrated solutions

A Family of Brands, United by Innovation
